Work Experience

Senior Software Engineer @ H & R Block

NOV 2023 - PRESENT

- Revamped payment onboarding journeys and integrated Adyen as the primary payment processor, improving system performance and reducing payment failures.
- Strengthened code reliability by adding unit and integration tests using React Testing Library and Vitest.
- Built reusable component libraries and documented them in Storybook to support design consistency across teams.
- Supported Wave HQ by developing modular and scalable UI components aligned with accessibility guidelines.
- Built and maintained full-stack marketplace integrations with Etsy, eBay, and Amazon, improving data synchronization and third-party onboarding.
- Triaged and remediated security vulnerabilities, while maintaining code quality through automated testing, reusable UI components, and on-call incident response.

Software Developer @ IGDS Technologies

MAR 2021 - NOV 2023

- Delivered modern, responsive web interfaces using React.js and Redux with a strong focus on user experience.
- Designed optimized MySQL database schemas using Sequelize, improving data retrieval and efficiency.
- Developed secure, modular REST APIs using Node.js and Feathers.js to support backend functionality.
- Implemented JWT-based authentication and role-based access control, while improving application performance through caching, middleware tuning, and optimized state management.

Java Full Stack Developer Trainee @ Quest Innovative Solutions

SEPT 2019 - DEC 2019

- Built Java EE applications using Spring and ORM frameworks, focusing on maintainability and system stability.
- Worked extensively with Java's internal mechanisms including class loading, memory handling, and transactions.
- Developed REST services, integrated relational databases, and followed test-driven methodologies to ensure high-quality releases.
Environment: Java, JEE, Spring, SQL, ORM, REST APIs.

Skills

Programming language

JavaScript, TypeScript, HTML5, CSS, Sass, GraphQL

Libraries & Frameworks

React, Redux, Node.js, Express.js, Feathers.js, REST APIs CSS, Styled Components, Vitest, Jest, RTL.

Database

MySQL, Sequelize ORM

Tools & Platforms

Git, GitHub, AWS, Vercel, Storybook, Jira, Twilio

Selected projects

WaveApps

Helped small business owners manage invoicing, online payments, and accounting.

Topsdraw

Platform for reviewing and discovering digital, tech, and creative agencies.

Stack Docket

A legal management web app for attorneys to manage clients, cases, and hearings, with automated daily reminders for upcoming hearings.

Education

Bachelor of Technology (B.Tech),
Electronics and Communication
Engineering

Cochin Institute of Science and
Technology

CGPA: 6.71
